Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Drawings

Figures 5 and 6 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

The drawings are objected to because in Figure 1, the term "A-A" should be replace with the numerals --3-3-- or --III-III- and/or --4-4-- or --IV-IV--. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and

Art Unit: 3654

informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

The disclosure is objected to because of the following informalities: page 6, line 7 and page 8, line 3, the term "A-A" should be replaced with the term --3-3-- or --III-III-- to reflect the changes in the drawings. Page 9, line 24, the term "A-A" should be replaced with the term --4-4-- or --IV-IV-- to reflect the changes in the drawings

Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1-3 and 7-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Chiu et al (U.S. Patent No. 5,639,042).

With respect to Claims 1-3 and 7-10, Chiu et al, Figures 1-13, teach a reel driving device 1, comprising, a reel stand 1 for driving a reel to rotate; and a latch 60 including at least one contact portion contactable with the reel wherein the reel stand includes a convexed and concaved portion (e.g. Figure 3); the latch includes a claw portion for, when contacting the convexed and concaved portion, stopping a rotation of the convexed and concaved portion; while the reel stand rotates in a first direction, the latch moves in such a direction that the claw portion

Art Unit: 3654

and the convexed and concaved portion contact each other by a rotation of the reel stand being conveyed to the at least one contact portion; and while the reel stand rotates in a second direction, the latch moves in such a direction that the claw portion and the convexed and concaved portion are separated from each other by a rotation of the reel stand being conveyed to the at least one contact portion; wherein a position of a rotation axis of the latch and a position of a rotation axis of the reel stand are different from each other; a rotation shaft 10 of the reel stand is provided on a chassis (see Figure 2); the chassis includes a contact portion (center shaft about which element 60 rotates) which is point-contactable with the latch, the latch rotates with a position at which the contact portion of the chassis and the latch-point contact each other as a center of rotation.

Allowable Subject Matter

Claims 4-6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
